FRAME MATERIAL

Nova Frames not only comes in trendy designs but also advanced frame materials. A fine selection of frame materials such as ULTEM, Acetate, TR-90, Metal and Nylon are used which offers both light weight comfort and durability.

ULTEM

- Light Weight
- Flexible
- Durable
- Heat & Flame Resistant

ACETATE

- Light Weight
- Flexible
- Durable
- Hypoallergenic

TR 90

- Light Weight
- Flexible
- Durable
- Anti Slip

β PLASTIC

- Light Weight
- Flexible
- Durable
- Ultra Thin

METAL

- Strong
- Durable
- Cutting Edge Design
- Light Weight

**‘READY TO WEAR
EYE GLASSES’**
that protect your eyes
from UV & blue light.

To know more, log on to www.blumaxlens.com
Blumax is a registered trademark of Vision Rx Lab.

What is Blumax Lens

Common sources of Blue-light

Blumax lens is a revolutionary material which by virtue of its material property absorbs harmful UV rays & high energy Blue Light. It is a neutral color-balanced substrate, blended in the lens material while the lens is casted. It doesn't alter the inherent properties of the lens material, but ensures enhanced protection to the eyes by absorbing UV & high energy Blue light entering the lens. Additionally, it helps to enhance contrast & thus ensures clearer vision.

What Blumax Lens actually does

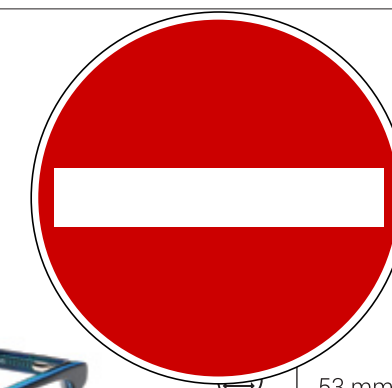

Blumax Lens cuts down UV rays & a major portion of the harmful HEV blue light thus offering higher levels of protection to our eyes from potential danger.

Solutions we provide

Ready To Wear BluMax Frames

Plano Users – Get these frames off the counter and start protecting your eyes from harmful blue light from any digital devices

Users in need of Vision Correction – Get the lens in your own prescription from SV to BiFocal to PAL.

RECOMMENDATIONS & CARE

HOW TO PROLONG THE BEAUTY OF YOUR EYEWEAR

General Recommendations

- 1. To prevent damage or breakage when not being worn, always keep the lenses in case that was given at the time of purchase.
- 2. Avoid contact with mercury, products containing strong solvents such as acetone, liquid cleaners and detergents.
- 3. Do not expose the lenses to very different or excessive temperature as this may damage the lenses. Or frames.

Care

Regularly wash the lenses in slightly soapy water then rinse them in clear water and dry them well using the Nova cleaning cloth

If sunglasses are to be put away for a length of time, clean them as described above and store them in clean, dry place at less than 50°C(120°F) and more than -15°C(5°F)

Adjusting the frame

Never attempt to adjust or repair the frames. this must be done by staff at a Nova boutique or by a Nova authorized opti
